

TLA

The Solution for Marine Fuels and Downstream Products Distribution

A brand-new terminal designed to accommodate maritime fuel and downstream products, with ample space available for expansion to store future fuels and other liquids

Storage Capacity up to:

84k m³

Available area for up to

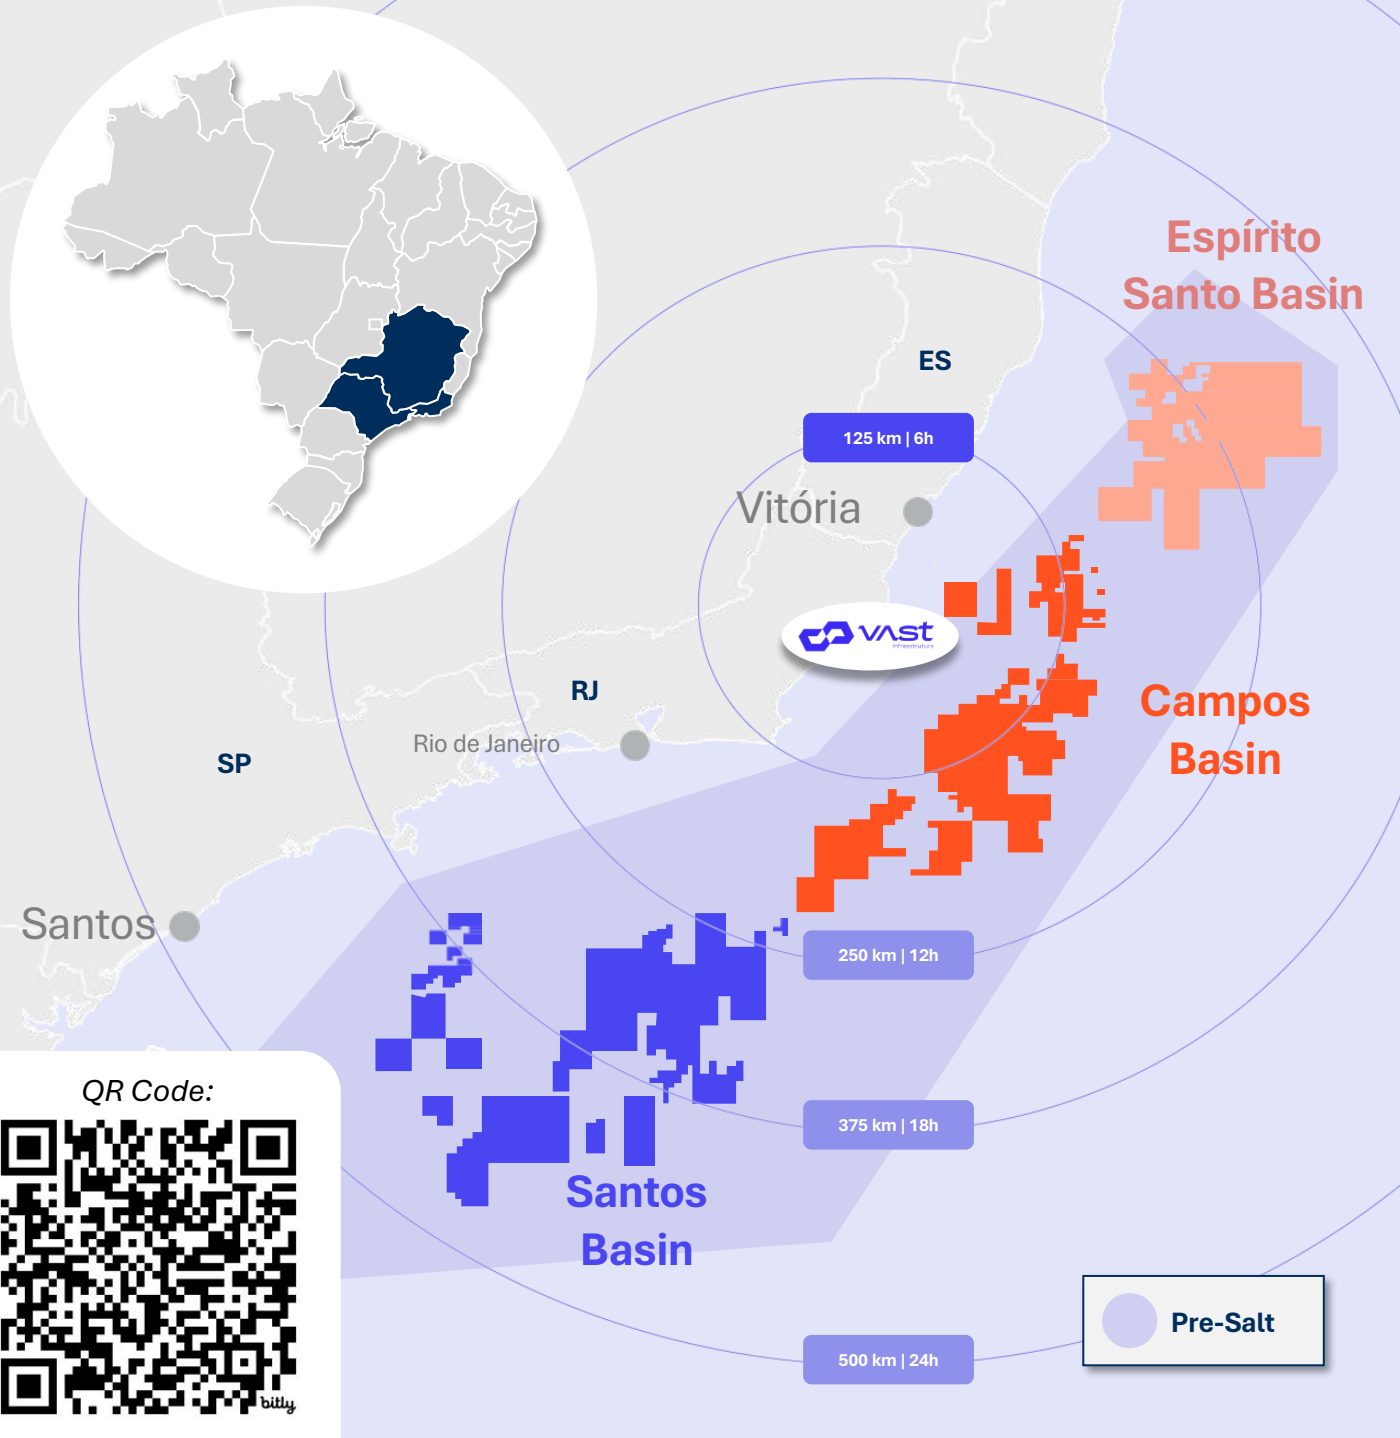

22 tanks

Total Investment

BRL 300M

Expected Operation Start

4Q2025

ADVANTAGES

- **Liquid logistics hub at Port of Açu, with a privileged location** close to major Brazilian oil fields such as the Santos, Campos and Espírito Santo Basins
- **Storage and logistics for petroleum products and biofuels**, as well as access to new potential markets such as lubricants and chemicals
- **Sustainable port-industry strategy**, facilitating the transition from petroleum storage and handling to alternative liquids
- **Synergy through one-stop-shop concept with Vast**, owner and operator of the only private VLCC terminal in Brazil, with more than 1/3 of Brazil's oil exported through its terminal
- **Logistical solution through cabotage**, reducing truck traffic and equivalent CO2 emissions
